

Instructions:

For each round, the Observer will have 1 minute to observe the sculpture. After the minute is up, the Observer will have 4 minutes to return to your group and give them instructions on how to re-create it. If your group thinks you have it, you may ask a member of the Orientation team if it is correct. They will answer yes or no.

An additional clue:

According to Cathy, you should code this method in every Java class you write. The correct page number in your textbook that covers this will also help you call the person on the business card.
